SELECTED PROJECTS

- 2015
|
2017
- **Amelia**
Universidad Icesi + Carvajal Carvajal UNIVERSIDAD ICESI
 - Amelia is a compact domain-specific language tailored for specifying and executing deployment workflows for distributed software systems
 - We used Amelia's composable and extendable subsystems to specify and deploy 50+ architectural variations to improve the reference architecture of a software family and improve its performance and scalability
 - Source code, documentation and evaluation are available online at github.com/unicesi/amelia and github.com/unicesi/amelia-evaluation*Technologies* Java, Xtend, Xtext, Maven, Rultor
 - **Foodie**
University of Victoria + IBM IBM University of Victoria
 - Foodie is a conversational kitchen assistant aiming at minimizing food wastage by optimizing the use of groceries and assist families in improving their eating habits through recipe recommendations, taking into account personal context (e.g., allergies and dietary goals) while helping reduce food waste and managing grocery budgets
 - **Foodie Fooderson: A Conversational Agent for the Smart Kitchen** was published at CASCON'2017*Technologies* Java, Maven, IBM Watson Conversation & Speech APIs
 - **Stacky**
 - Stacky is a jQuery plugin that makes it easy to create user interfaces with panels that open horizontally. Panels can be opened, closed, expanded and collapsed. A panel can be opened in regular mode (pushed next to a panel) or in floating mode (absolute position)
 - 245+ stars and 20+ forks on Github
 - Source code and documentation are available at github.com/jachinte/jquery.stacky*Technologies* JavaScript, jQuery, Sass, Grunt, Bower, npm
